## Trend 09 & 13

# Korrelation der Ergebnisse mit Dichte

- Insgesamt korrelieren die Ergebnisse mit der Bevölkerungsdichte vor allem im Westen (NRW) von 2009 auf 2013 stärker. (Korrelationskoeffizient von 0,54 auf 0,7).
- Korrelation bedeutet: Es besteht ein Zusammenhang zwischen den beiden Merkmalen.
- **Keine zwingende Kausalität:** Es **muss nicht** bedeuten, je dichter ein Wahlkreis, desto höher das Ergebnis. Es kann z.B. daran liegen, dass in dichteren Wahlkreisen mehr junge Menschen leben. Es **kann** aber auf eine Kausalität hinweisen.

- Baden-Württemberg erreicht unter den (18-25) fast die gleiche Wähleranzahl wie (25-35).
- Für die neuen Bundesländer spielt die Altersgruppe 25-35 mit 34,02% die mit Abstand größte Rolle in ihrer Wählerschaft (Berlin 37,22%, Sachsen 34,74%).
- 25,03%, d.h. Jede 4.Wählerin aus Brandenburg ist 46-60 Jahre alt. Ungewöhnlich viel für PIRATEN.

## +/ - zu 2009

- Besonders bei den ganz jungen Wählerinnen (18-25) verloren
- Dafür bis auf Ausnahmen in allen anderen Altersgruppen in den 7 untersuchten Bundesländern hinzugewonnen
- Berlin ist in der Altersgruppe 60+ von 0,5% auf 1,7% gestiegen
- Eine einfache Interpretation wäre dass die Wählerschichten älter geworden sind, dafür aber nicht genausoviele junge Wähler nachrücken

# Anteil Abiturienten in % im Wahlkreis

PP13

# Anteil % Abiturienten im Wahlkreis

- Die besten Wahlkreise haben einen überdurchschnittlich (gemessen an Deutschland) hohen Anteil an Abiturienten
- Dennoch gibt es auch viele Wahlkreise mit sehr hohen Anteil an Abiturienten und schwachen Ergebnissen unter 2% wie München Land, Hannover Stadt I, Land I und II, Göttingen und Niemburg II – Schaumburg –
- Rhein-Neckar, Mannheim, Dresden I und II sowie Leipzig I und II ragen aus den „abiturärmeren“ Wahlkreisen mit guten Ergebnissen über 3% heraus ++

# Korrelation mit % Anteil Bildungsabschlüssen in Wahlkreisen

# Korrelation mit Bildungsabschlüssen

- Insgesamt nimmt die Korrelation anhand der Bildungsabschlüsse ab
- Das heisst, man kann anhand der Verteilung der Bildungsabschlüsse in den Wahlkreisen weniger Zusammenhänge mit Ergebnissen der PIRATEN erkennen
- Ein hoher Anteil an Abschlüssen in mittl. Reife deutet immer noch auf ein niedriges Ergebnis hin

# Korrelation mit Arbeitslosenquote/ SGBII Empfänger im Wahlkreis 09 & 13

# Soziales

- Die Korrelation hat sich von 2009 auf 2013 nicht verändert.
- Eine hohe Arbeitslosenquote zeigt nur einen kleinen Zusammenhang mit PIRATEN Ergebnissen auf
- Das liegt vor allem am Ruhrgebiet & ländlichen Gebiete im Osten, wo PIRATEN unterdurchschnittliche Ergebnisse erzielen

- In den 3 grünen Hochburgen Berlin, Dresden, Leipzig mussten die Grünen die größten Verluste hinnehmen
- In nicht so bevölkerungsdichten Wahlkreisen wie Rostock, Halle, Gera/Jena, Potsdam, Chemnitz bleiben die Grünen aber merkbar ohne große Verluste

# Grüne/Piraten +/- im Westen

## Grüne/Piraten +/- im Westen

- Ausser den Berliner Wahlkreisen kaum noch Zusammenhänge durch Gewinne/Verluste zu erkennen.
