PROFIL

Creative thinking and executive power are the forces that have moved Ronald F. Springer throughout his unique career. A man who has not lost his early vision and enthusiasm in introducing products to make the world a better place. His vision has not gotten old, instead they became mainstream in many ways. In his over thirty years of working experience lots of new technologies and products have been introduced into the marketplace through his diligence, he was instrumentally involved in creating, financing and marketing many breakthrough ideas. From the beginning of the seventies until now he is in contact with new technologies and its inventors, helping new ideas become successful. In his unique approach hands-on experience and direct self involvement in research as well as product development plus financing and marketing, one can say that in many ways he is a pioneer and definitely an entrepreneur.

Dr. Schmitt-Walter Gmbh, Regensburg Germany CEO, Kapital Investment	2004-today

EXPERIENCE

Because the environmental is his world, so has Ronald sailed in all oceans and travelled all five continents. He dedecated a whole decade traveling the world, therefore challenging the establishment and persuing main question who am I, why am I here. The rebel in this case was not without a cause, and much less was he naive in believing he could do it small or modestly. Whether it has been clear that all good projects needed funding to be successful. Out of this knowledge he created in 1979 the first over-the-counter investment banking in Hamburg, which became in a very short period a huge success and twenty years later the Germany „new market“. In this quest he met many influential people who guided his way and he was involved in early stage in developments that formed significant our world today (Marcuse, Timothy Leary, Dalai- Lama, Bob Marley, Rudolf Augstein, Rudi Dutschke, Helmut Schmidt, Alan Greenspan, Ted Turner, Al Gore, Steve Jobs, Pele, Axel Springer)
