Click on **Open** to get the matrix definition and complete all components listed in the screen. Add the data to create your matrix and click on **Save**.

[View Instructions](#)

Matrix name:

Matrix type:

Matrix dimensions: (1,1)

Matrix:

Completed the matrix

The screenshot shows a software window titled "Matrix Editor" with a standard toolbar. The main area displays the matrix definition:

Matrix name: Matrix 1

Matrix type: Default

Matrix dimensions: (1,1)

Matrix: 0

Matrix Inverse: 0

The interface includes a toolbar with various icons for file operations, editing, and matrix functions. The matrix value is shown as "0" in a text input field.

New Listing

Test (page 4 of 4)

How good are you really at reading? The second test is called your "speed" or your "rate." The test is how quickly you finish your work.

Import Contents

1 of 3 items selected | 1 of 3 items | 1 of 3 items | 1 of 3 items

Choose Data Source (step 1 of 4)

By choosing this option, you will import the data from the specified source. For example, you can import the data from a third-party web site, a spreadsheet, or a database. You can also import the data from a file on your computer.

Choose File Name

File Name:

Import Settings

Import ID:

Import ID is used to identify the data source. It can be any alphanumeric string. It can be up to 255 characters long.

Import ID must be unique.

Import data from source

Import data from source will overwrite any existing data in the target table.

Table Name

Table Name:

Table Name is used to identify the data source. It can be any alphanumeric string. It can be up to 255 characters long.

- Import data from source
- Import data from source and merge with existing data
- Import data from source and merge with existing data (if existing data is empty)
- Import data from source and merge with existing data (if existing data is empty and source data is not empty)
- Import data from source and merge with existing data (if existing data is empty and source data is not empty)
- Import data from source and merge with existing data (if existing data is empty and source data is not empty)

Import data from source will overwrite any existing data in the target table.

Import ID:

Import ID must be unique.

Import Contacts

Share Data Source (page 1 of 3)

The page information you're using to import contacts from also applies to iCal. For example, if you specify the contact is affiliated with a school, you select the school in the address book. Contact us for more information.

Share Information

Set how contacts are shared with

Importing

Import from

Select how to import contacts from iCal. The contacts iCal imports to your address book are shared by default with all contacts in the iCal.

Import contacts only (iCal)

Import contacts from iCal to your address book. Contacts are not shared.

Importing

Share with Everyone Everyone except me No one
